

## Poor receiver

Immediate continuous news are displayed On TV screens, mobile phones, etc. something always grab their cushy show off opportunity such as flakes, parasites, and most interestingly, the viewer himself, who will not be able to perceive and touch the bad news about others. If he doesn't change the channel or stop looking at it and decides to comprehend the news wholeheartedly, the image that forms in his mind will be far from the reality, abstract, vague, full of noise and flaks because we are unable to comprehend the suffering of others.
